

Jane Doe
Senior Backend Engineer
jane.doe@example.com | (555) 123-4567 | San Francisco, CA | linkedin.com/in/janedoe-fictional

SUMMARY

Backend engineer with 7 years of experience building distributed systems in Go and Python. Led platform teams at two startups through significant scale milestones. Strong on observability, database internals, and pragmatic API design.

EXPERIENCE

Staff Backend Engineer — Acme Corp

San Francisco, CA | March 2022 – Present

- Designed and shipped a sharded PostgreSQL multi-tenancy layer serving 40M monthly users.
- Reduced p99 API latency from 820ms to 180ms by introducing query plan caching and connection pool tuning.
- Mentored 4 mid-level engineers; ran weekly internals reading group on database storage engines.
- Owned the production incident review process; cut mean time to resolution by 35%.

Senior Software Engineer — Helix Analytics

Remote | July 2019 – February 2022

- Built the event ingestion pipeline (Kafka, Go) handling 2B events/day with at-least-once guarantees.
- Migrated billing service from monolithic Rails to a Go microservice; eliminated nightly outage class.
- Led the on-call rotation overhaul, including runbook standardization and SLO definitions.

Software Engineer — NovaCart

Boston, MA | August 2017 – June 2019

- Wrote checkout service in Python (FastAPI) handling Black Friday peaks of 8K req/s.
- Implemented idempotency keys across payment flows; eliminated duplicate-charge support tickets.

EDUCATION

B.S. Computer Science — University of Illinois Urbana-Champaign

2013 – 2017 | GPA 3.7

SKILLS

Languages: Go, Python, SQL, TypeScript

Infrastructure: PostgreSQL, Kafka, Redis, Kubernetes, AWS (RDS, EKS, S3, SQS), Terraform

Practices: Distributed systems, observability (OpenTelemetry, Prometheus), incident response
