Professional Summary

Data analyst with 3 years of experience building data pipelines and reporting infrastructure for mid-market SaaS companies. Strong Python and SQL skills with hands-on experience in cloud data warehouses and ETL workflows. Currently transitioning into a data engineering role.

Professional Experience

Data Analyst — BrightData Inc.

August 2022 — Present

- Build and maintain data pipelines using Python and SQL to support analytics reporting.
- Develop ETL workflows in Airflow to ingest data from Stripe, Salesforce, and internal APIs.
- Design dimensional models in Snowflake to power executive dashboards.
- Collaborate with data analysts and product managers to define metric definitions.
- Implement data quality checks for critical reporting pipelines.

Junior Data Analyst — RetailScope

June 2021 — July 2022

- Wrote SQL queries to support business intelligence reporting in Looker.
- Built Python scripts to automate data extraction from third-party APIs.
- Migrated legacy reporting from Excel to a modern BI stack.
