

Priya Rao
Data Scientist
priya.rao@example.com | (555) 246-1357 | Austin, TX

SUMMARY

Data scientist with 4 years of experience turning messy product data into shipped models. Comfortable across the stack from SQL to deployed inference services.

EXPERIENCE

Data Scientist — Helix Analytics
Austin, TX | June 2022 – Present

- Shipped a customer-churn prediction model (XGBoost) used by the customer success team weekly.
- Built feature engineering pipelines in dbt, processing 50+ tables nightly into a feature store.
- Ran A/B test analysis for product launches; collaborated with PMs on experiment design.
- Wrote internal tooling in Python (Streamlit) for self-service cohort analysis.

Junior Data Scientist — NovaCart
Remote | August 2020 – May 2022

- Maintained the recommendation system retraining pipeline (Airflow, Python).
- Did exploratory analysis for marketing on attribution and lifetime value.
- Replaced a brittle Excel-based forecasting workflow with a Python notebook reviewed monthly.

Data Analyst Intern — Acme Corp

San Francisco, CA | June 2019 – August 2019

- Built a Tableau dashboard for the operations team tracking warehouse throughput.
- Wrote ad-hoc SQL for cross-team data requests.

EDUCATION

M.S. Statistics — University of Texas at Austin
2018 – 2020

B.S. Mathematics — University of California San Diego
2014 – 2018

SKILLS

Languages: Python, SQL, R

ML: scikit-learn, XGBoost, LightGBM, PyTorch (familiar)

Data: dbt, Airflow, Snowflake, Postgres, Pandas

Other: A/B testing, experiment design, Streamlit, Tableau
